

Oggi Elevation: The Complete Body Positioning Pillow System

Say goodbye to those sleepless nights with the Oggi Elevation Complete Body Positioning System. The Oggi Elevation Complete Body Positioning System has a curve shaped, shoulder support design that contours to the shoulder and provides a soft sleep. The wedged support provides a perfect angle to fall into.

With our patented Slumber Science Technology, the Oggi Elevation was engineered for You to sleep like a baby.

Many medical afflictions hinder an individual's ability to successfully enjoy a painless, restful sleep. In some cases, body positioning and support combined with upper body elevation offer enough relief to facilitate a less painful and more restful sleep. The Oggi Elevation combines both upper body elevation and body positioning into one great system.

The Oggi Elevation is designed for people with afflictions such as back pain, degenerative muscular and neurological ailments, reflux, restless leg syndrome, pregnancy and other conditions which impact the ability of an individual to get into and maintain a comfortable well supported back or side sleeping position.

This complete system also functions as a lower back sitting support system, while lying in bed or on the floor. Fold the legs over your lap and it doubles as a nursing pillow.

- SKU: 91608
- UPC: 022791947593
- Color: Latte
- MSRP: \$199.99
- Case Pack: 1
- Shipping Weight: 11 lbs.
